the authors' knowledge, this is the first study to examine the effects of a single session of a group-based, self-help program on the health-related quality of life of people with chronic low back pain. The authors also note that the study was limited by the lack of a control group, and that the results may not be generalizable to other populations. However, the authors conclude that the study provides preliminary evidence that a single session of a group-based, self-help program can improve the health-related quality of life of people with chronic low back pain.

**1. Chemicals** *Chemicals, including pesticides, are used in agriculture, industry, and in the home. They can be harmful to the environment and to human health. Proper handling and disposal are essential to minimize risks.*

1. *Polysaccharide*—A complex of many sugar units connected by chemical bonds. Polysaccharides are important components of cell walls and are used for energy storage. Examples include starch, glycogen, and cellulose.

1. *Staphylococcus aureus* (Staphylococcus aureus) and *Staphylococcus epidermidis* (Staphylococcus epidermidis) are the most common bacteria found in the human body. They are both Gram-positive, spherical bacteria that are often found in clusters. *S. aureus* is a more aggressive pathogen than *S. epidermidis*, and is responsible for a wide range of infections, including skin infections, pneumonia, and sepsis. *S. epidermidis* is a more common skin commensal, but can also cause infections, particularly in hospital settings.

the 1990s, the number of people in the United States who are obese has increased by 50 percent. In the United Kingdom, the prevalence of obesity has increased by 100 percent in the last 20 years. In the United States, the prevalence of obesity has increased by 100 percent in the last 20 years. In the United Kingdom, the prevalence of obesity has increased by 100 percent in the last 20 years. In the United States, the prevalence of obesity has increased by 100 percent in the last 20 years.

by the **International Commission on the History of Statistics**, which was set up in 1970. The commission was created by the **International Statistical Institute** (ISI) and the **International Statistical Association** (ISA). The commission's task was to study the history of statistics and to promote the development of statistics as a science. The commission's work has been published in the **Journal of the History of Statistics**, which was founded in 1976. The journal is published by the **International Statistical Institute** and the **International Statistical Association**. The journal's content includes articles on the history of statistics, the history of statistical theory, and the history of statistical practice. The journal is a valuable resource for statisticians and historians alike.
